GREAT FUTURE FOR THE YANKEE GON

Fine Ore Body in Tintic's Young Bonanza.

Probably 75,000 shares of the company's securities are held in Eureka by investors, who condidently expect to draw dividends on it within its weeks. Outside of a few people who are thoroughly conversant with the plans of Dr. Fravidia and the wealthy gentlemen who are associated with him, and underground sonditions at the Yankee and that portion of "Uncie" Jesse Knight's domain for which the Frank-lin syndicate recently parted with a quarter of a million dollars, the public has but a faint idea of the resources of pany. While the recent disclosures in Yankee ground would excite any one not familiar with the big ore deposits that are characteristic of the limestone of this section, they pale into insignificance beside the dazzling aspect of the big orifice that has been made in the mamintorib lead stope within the lines of that part of the Riumbug which has been storilly parted by William Geizer, who sunk the well for the walls -f galena sparkle". The walls -f galena sparkle is the walls -f galena sparkle is the walls -f galena sparkle is a polybour the walls -f galena sparkle is the walls -f galena sparkle is the walls -f galena sparkle is a force of seven men. When the main tunnel from the Yankee, the candle light like a cave of precious stones, and which has been storilly bulk-headed and carefully locked by Superintendent Guenther, Jesse Knight was drawing a profit of \$1,000 daily with a force of seven men. When the main tunnel from the Yankee, the face of the Yankee. To begin with, the ore zone has been tapped in Yankee ground will be quadrupled.

A study of the map of Godiva hill and a mathematical calculation gives an approximate idea of the possibilities of the Yankee. To begin with, the ore zone has been tapped in Yankee ground will be quadrupled.

brightest one in the firmanent of Tin-tic bonanzas.

CONDITIONS AT MARTHA. Good Reports Brought Back by Tintie Visitors.

Nearly 300 people took advantage of the excursion to Tintic yesterday to visit the different properties in which they are interested. Of those who returned, none were more enthusiastic than those who were given permission to examine the underground workings of the Martha Washington, the prop-erty that has been responsible for some lively times on 'change during the past two weeks.

Manager Snow was at the mine himself and quite a number of shareholders and sightseers were taken through previous to the departure of the train for this city. Manager Snow, when asked for a statement, said the station at the 550 level was completed Saturday night and a drift west on the vein, which is six feet wide at that point, was started yesterday. Two nice streaks of high-grade ore were exposed, while several small stringers of rich rock were interlaced with the second-grade material. On the east side of the station practically the same conditions exist and as soon as matters are shaped around, drifting in that direction will begin also. Since cutting the station was commenced all other work has been suspended. Now, however, operations on the 350 and 450 levels will be resumed, with every indication, Mr. Snow says, that a gratifying showing will be made.

From J. W. Edmunds and one or two other gentlemen who went through Manager Snow was at the mine him

two other genilemen who went through the word through the word of the series and the property level there is four feet of ore that has been penetrated for quite a distance in the west drift, and no small portion of it will run light enough to express the property of it will run light enough to express the property of it will run light enough to express the property of it will run light enough to express the property of it will run light enough to express the property of it will run light enough to express of the property two other gentlemen who went through the mine it was learned that good bodies of milling ore are expected on every level from the 250 to the 550. On

CONDITIONS AT MARTHA

ard; F. H. Mead, well known in mining circles here and in Leadville, and Harry Schroeder, a Leadville capitalist, visited the Green river oil fields the latter part of last week. Before returning to Leadville yesterday, Mr. Shrader expressed his views of what he saw in an outing of two days in and around Green River. He is enthusiastic over the probability of this proving to be one of the notable oil fields of the world. As to quality, he pronounces the oil to be a superior grude, and is convinced that it is his opinion that the crude product will be worth not less than \$3.50 a barrel at Green River, though as soon as the first well's yield shows of any monany's securities are held in Eureka by investors, who confidently expect to ard; E. H. Mead, well known in mining

The readers of The Herald are ac-The readers of The Heraid are acquainted with the general surface conditions, and the oil flows in summer along the banks of the river, at different points from twenty-live miles to over 100 miles below Green River. In speaking of these, Mr. Shrader said that more positive surface indications of oil in quantity cannot be imagined. of oil in quantity cannot be imagined. In the meantime Dr. Franklin is busy with plans for an extensive plant, with electricity as the motive power, to busy the plans for an extensive plant, with electricity as the motive power, to busy the plans for an extensive plant, with electricity as the motive power, to busy the physical condition underground. Briefly summaried, the summaried the meantime the Yankee has more than 300 feet, horizontal of stoping ground in the case of the condition underground. Briefly summaried, the Yankee has more than 300 feet, horizontal of stoping ground to exposed in two places, has practically concluded its dead work for months to come, is entirely out of debt, able at present to ship daily a carload of creworth 51,000, and is under most excellent management; its stay is the base of the projects of ounce rock had not been reached. At that hour the superintendent telephoned in that the first round of holes fired by the night shift had exposed a full breast of silver ore fully as rich, if not richer, than that existing on the 700 and 800 levels. "That." said Mr. Bamberger. "is what we have been after and that it was not sooner encountered, I confess, was rather disappointing not only to myself, but to others. The report received tonight settles the matter, for we now know that our copper and silver-bearing chutes both go down and we no longer have any reason to doubt that the Lower Mammoth is, in every sense of the word, a mine."

the word, a mine. The gentleman stated, also, that the new machinery was being gotten in place as rapidly as possible and everything was about in readiness to go on developing and shipping without hindrance of any description.

NOTES FROM TINTIC. Electric Ore Finder-Sampling the

Bullion-Beck.

(Special Correspondence.)
Eureka, Utah, April 28.—George W. Wilson, the California geologist, metallurgist and expert electrician, who is the possessor of a simple elec-tric contrivance which he terms the "electric-geodetic ore finder," is making a careful test of that part of Hoing a careful test of that part of Homansville mountain embraced in the R. G. W. group. The gentleman was accompanied by Dr. Theodore Meyer, J. Barnett, Guy Sterling and Ben D. Luce. He will remain several days and explore the hidden recesses of some other very promising prospects in the search of the precious metals.

P. M. McCree, F. B. Cooke and T. L. Huddleston, who recently sampled the Grand Central under the direction of Duncan McVichie, in the interest of the Bingham Copper & Gold Mining company, are busily engaged along

next shipment might be expected, and replied that he would rather speak of it when it came than to make promises in advance. One of his visitors, however, made the remark that he saw a carload of rich ore ready to send the first big consolication in Tintic discrete.

PARK MINING NOTES.

Week's Resume of Happenings in the Big Camp.

(Park Record.) John Rhoden has had two shifts working steadily on the Thunderer group. Work is now going on sinking the shaft at the face of the tunnel, 600 feet in. The shaft is now down a distance of forty-five feet, all the way in good ground. Mr. Rhoden says the property is looking up splendidly.

Some time ago a rumor was afloat, to the effect that the Marsac mill was soon to close down on Ontario ore and

to the effect that the Marsac mill was soon to close down on Ontario ore and begin treating Ontario tallings. The report was not without foundation, as that is soon to be the order of things, the change to take place about the middle of next month, when the ore now on hand has been cleaned up.

Superintendent Hickey of the Comstock was down Thursday. He has been busy the past few days putting in the large pump to forestall any un-

been busy the past few days putting in the large pump to forestall any undue volume of water which may come in. The drift off from the tunnel is now in about thirty-five feet. The pump was expected to be ready for business this morning, when the drift will be pushed with all possible speed, with no danger of interruption.

Yesterday the Daly commenced making another shipment of ore, and reports from the property are to the effect that the mine is looking splendidly and ore bodies on which work is now and ore bodies on which work is now being done improves with every shift. With a progressive management, there is no question that the Daly would soon

being done improves with every suite. With a progressive management, there is no question that the Daly would soon be put on the dividend paying list, and it is confidently expected that such will be the case before the year is out.

The board of directors of the Callfornia Mining company met Thursday and authorized the placing of 5.000 shares of treasury stock on the market at 50 cents per share: The proceeds will go to pay for the new mill just installed, which is now running steadily and satisfactorily. Work is still progressing in the lower tunnel, and the management says it would not surprise them to break into the large ore chute at any shot.

W. P. O'Meara and George Wilson were up from Salt Lake most of the week on mining business. With local men they made a trip into the hills and examined some propositions. It is said they have four different properties under consideration, and that a deal for at least one of them is likely to be consummated in a short time. The gentlemen have strong easiern backing, who are anxious to become interested in mining matters in this district.

The traction rope of the Silver King aerial tram was stretched Thursday. And, by the way, this was accomplished in a shorter space of time than any like job on record. Foreman J. B. Fleming of the Silver King mill put twenty good men on the work, and in just three hours the double cable, measuring 14,500 feet of rope was on the steel towers from the mine to the terminus, and it is there to stay. The work of stringing the two standing cables of 7,000 feet each is now going on, and in a short time the tram will be ready for carrying purposes. The new sampler is all but finished, and the belts will be thrown on the first of the com-

smelter trust, Jesse Lewisohn is quoted as saying:

"The consolidation of the Guggen heims and the American Smelting & Refning company gives us a monopoly of the smelting business. Great benefits will accrue from the fact that the United Metals Selling company will act as the selling agents for the combined concern. The treasury of the smelting company, which shows cash on hand of \$19,000,000, represents only a pro rata is simply a result of the requirements of the business, are sumption that the heavy cash holding foreshadows the possible purchase of other concerns, as no such move is contemplated. Competition has now been practically eliminated, and the company would not benefit from any further consolidation."

The statement is a special concerns as no such move is contemplated. Competition has now been practically eliminated, and the company would not benefit from any further consolidation."

Atlanta, Ga.,

(Austin Reveille.)

Hon. T. J. Bell, after a visit of several days in Austin, departed for his home on upper Reese river. Friday morning. On Thursday he signed and morning. On Thursday he signed and turned over the necessary papers to a Boston and Iowa company, which gives said company possession of the Tybo preperties. The papers were all drawn up at the bank of Austin and forwarded to Belment by Mr. Miller, he acted for the company, to be recorded. The transfer includes seven patented mining claims, water rights, piping, twenty-stamp mill, smelter, store building, boarding house, hoisting works ing, boarding house, hoisting works and all properties belonging to the old Tybo company in that town. The consideration was \$15,000 cash down. The property was owned by Mr. Bell, Mrs. E. A. Page and one other party.

CONSOLS STILL WEAK.

worth of ore is exposed. A thousand feet square will cover the ground where the ledges crop out. The camp claims a population of 250. The terms of the option taken by Price and Brent are \$50,000 in taken by Price and Brent are \$50,000 in three months, and \$200,000 in six months. Leasers will not be disturbed for three months.

Price Advocate: Kirker. Whitmore and associates have lately taken out and shipped as a sample two tons of asphaltum from their properties above Sunnyside. They expect to shortly close a contract whereby several hundreds of tons will go east for paving purposes. The snow is still heavy between Sunnyside and the mines and it will be the first to the middle of June before wagons can get in and out with a load.

Reno Gazette: James Kinkead, a mining superimendent of Virginia City, spent the day vesterday in Olinghouse canyon and was nightly pleased with what he saw. Mr. Kinkead said if the canyon was 4,000 miles distant and one had to cross over, thirty or forty feet of snow to get there and suffer everything but death in making the journey the hustling Americans would be falling over each other to reach it. He predicted that before long the camp will occupy a prominent piece among the mining camps of the coast.

White Pine News: L. C. Doxy, the newly appropriate auterinted auterinted entert of the newly appropriated wither interest of the newly appropriated superintendent, of the LOWEST POINT SINCE 1890 IS REACHED.

London, April 28.-The stock exchange O ment piece among the mining camps of the coast.

White Pine News: L. C. Doty, the newly appointed superintendent of the Ely Mining & Milling company's properties at this place, arrived here from Salt Lake City last Friday evening, and on Saturday morning assumed charge of the mine. For several years Mr. Doty was the superintendent of the Eureka Hill mine at Eureka, Utah, and under his management that property was one of the heaviest producers in that state. For the past two years Mr. Doty has been superintending the development work in the Apex mine in the same locality, in which he is one of the owners, and he has the experience and ability necessary to successfully handle the promising property of the bily Mining & Milling company. enjoyed a fair amount of dealing during O the past week, while its tone has been decidedly cheerful, as it is believed that business will soon become more active. Consols remained the weakest on the securities, having sold down to 93%, which is the lowest price since 1890. They finished, however, above the lowest quotation. It is expected that the next settlement will disclose considerable bear account. The event of the financial week has been the issue of new consols, the subscriptions to which reached \$200,000,000.

During the week home rails improved all around, metropolitans gaining 7 and districts 1½ on the prospects of benefits arising from the introduction of electric traction.Telephone, 694-2

The mining market did not show any special feature. South Africans have evinced a firm tendency. De Beers improved 2½, Rands 34, and most of the others showed improvements ranging from 16 to 36, and there were but few mining stocks fractionally lower. Money was cheaper during the week, and at the following rates: Until Monday, 2½ to 3; for a week, 3½; and three months bills, 3% to 3½.

ON BERLIN BOURSE. The Money Market is Considerably Eased Up.

Berlin, April 28.-The money market now shows greater ease than for several years. The Reichsbank rate of discount is the lowest that has been in force since June, 1890, and the private rate is unusually low. Money for the monthly settlement is abundant. The Sehaudiung is making great offerings ocall money, of which only a small part has been taken, although rates are continuously relaxing. All reports represent the demand for money for trade and specuration as lessening. The monthly settlement is passing off very smoothly, engagements being light. The tone of the bourse throughout the week was rather firm, but business was limited. Discussing the week's movement and the part played by Wall street in it, the Vossische Zeitung says:

"The United States is today setting the pace in business and financial affairs. The magnet of the Berlin bourse pointed this week to New York, but Berlin lacks confidence in the American boom, and fears a crash at any moment. Hence there is great reserve here." count is the lowest that has been in allow a cough to run until It gets beyond the reach of medicine. They often say, "Oh it will wear away," but in most cases it wears them away.
